

Mentorship Session

B.Ed. Second Year

A mentorship session for B.Ed. Second Year students was conducted by the faculty members of the B.Ed. Department on 15 October 2025 to address students' academic concerns and provide essential guidance before their internship programme. The session aimed to support students in resolving difficulties related to lesson planning, classroom management, teaching strategies, and preparation of teaching aids. Faculty mentors interacted with the students both individually and collectively to understand their problems and offer suitable academic suggestions.

During the session, important instructions regarding the internship programme were also shared. Students were guided about maintaining discipline, punctuality, professional behaviour, proper record work and effective communication in schools. They were also informed about observation schedules, daily diary maintenance and the importance of regular attendance during the internship period.

The mentorship session proved highly beneficial as it motivated the students, clarified their doubts and prepared them confidently for their upcoming teaching internship experience.
