

Utilization of ICT Lab by Students

The ICT Lab of St. Thomas' College of Education plays a significant role in enhancing the technological knowledge and professional skills of B.Ed. students. The lab has been established with the objective of increasing students' understanding and practical knowledge of Information and Communication Technology (ICT), which is highly beneficial for their future teaching careers. The ICT Lab is used regularly by B.Ed. students regularly according to the prescribed timetable.

Students use the lab to learn digital tools, presentation techniques, internet resources, and educational software that support effective teaching-learning processes. The lab also helps students improve their computer skills, prepare PowerPoint presentations, access online educational materials and develop innovative teaching methods. Faculty members guide students in the effective use of ICT in classroom teaching and academic activities. Overall, the ICT Lab serves as a valuable resource for the academic, technological and professional growth of B.Ed. students.
